-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 July 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

1. Applicant's election without traverse of Group I, claims 1-22 in the reply filed on 7/5/05 is acknowledged.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Binnersley et al, U.S. Patent No. 4,947,897 in view of Sugimoto et al, U.S. Patent No. 6,004,888. Binnersley et al discloses a fabric woven from warp and weft tapes. See col. 1, lines 10-12. The tapes comprise fiber reinforced plastic and the fiber reinforcement may comprise glass fibers. See col. Example. The woven fabric is suitable for use in forming composites such as laminates or molded parts. See col. 4, lines 5-11. The warp and weft tapes may be overlapping at the edges. See abstract. Binnersley differs from the claimed invention because it does not teach that the reinforcing fabric is formed by crosslaying the warp and weft tapes and then interconnecting them via a looping fiber. Sugimoto et al teaches that forming reinforcing fabrics by crosslaying warp and weft fibers and then interconnecting them via a looping connecting fiber forms a stronger fabric because the fibers are straight and not bent at the points where the warp and weft interconnect in woven fabrics. See col. 2, lines 1-16. Therefore, it would have been obvious to have formed the reinforcing fabric of Binnersley by crosslaying

the warp and weft and then connecting the two plies by a looping connecting fiber as taught by Sugimoto, motivated by the expectation that this would enhance the strength of the reinforcing fabric.
